

How we work with our clients - Alvant

Alvant

Case Study – Alvant

Alvant is an advanced materials technology company that is fast becoming recognised as a world leader in the field of metallic-based composite materials and provides a broad range of innovative sustainable solutions that can increase the capability of the world's most demanding products. The company is working with some of the world's most renowned blue chip companies to help solve the challenges they face in maintaining their technological lead over their competitors, as well as to satisfy the intensifying regulatory, environmental and consumer requirements for cleaner energy and lower greenhouse gas emissions.

Alvant specialise in providing tailored metallic composite solutions for high-value products in fast growing markets, such as transportation (automotive, defence, marine and aerospace) consumer goods and industrial applications, driven by strong sustainability trends that have a requirement for three main capabilities:

- Motion and Logistics: the efficient operation of a product;
- Performance and Precision: high power and energy, but with precise control and dynamic stability; and
- Safety and Reliability: increased product life and reduced risk of failure.
- procedure, keeping detailed and contemporaneous notes and records, but reminding managers that what they do write is disclosable to the other party; and
- Highlight the serious nature of an Employment Tribunal claim and the time, cost and reputational impact it can have on the organisation.

Like many fast growing high-tech businesses, the company's requirements for office and factory space vary with time.

How did we work with Alvant?

Alvant were seeking new premises that would assist with their capital requirements and expansion of the business in the future. Our team helped explore different options for premises, assisted with the sale of freehold office premises and the lease of an industrial unit.

We were able to provide simple clear advice working within an evolving timeline completing matters within tight timescales to ensure Alvant were able to proceed quickly with their expansion.

“ Hannah was always on the end of the phone and gave really clear advice. She was pro active in resolving issues and it really was like she was an extension of our team. ”

Neil Collins
Founder and Executive Director

Alvant are targeting performance rotors because electric machine manufacturers are pursuing increased power density (kW/kg).

The Alvant logo consists of the word "Alvant" in a bold, blue, sans-serif font. The letter 'A' is stylized with a horizontal bar that extends to the left and ends in a small arrowhead pointing towards the letter.
